EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Hamilton on 6/9/2010.

The application has been amended as follows:

The abstract is replaced with the following:

The invention relates to an electronic atomization cigarette which only contains nicotine without harmful tar. The electronic atomization cigarette includes a shell and a mouthpiece. The external wall of the shell has an air inlet. An electronic circuit board, a normal pressure cavity, a sensor, a vapor-liquid separator, an atomizer, a liquid-supplying bottle are sequentially provided within the shell, wherein the electronic circuit board comprises an electronic switching circuit and a high frequency generator. A stream passage of the sensor is provided on one side of the sensor, and a negative pressure cavity is provided in the sensor. The atomizer and the liquid-supplying bottle is in contact with each other. An atomization cavity is arranged in the atomizer. A retaining ring for locking the liquid-supplying bottle is provided between one side of the liquid-supplying bottle and the shell, and an aerosol passage is provided on the other side of the liquid-supplying bottle. The air inlet, normal pressure cavity, vapor-liquid separator, atomizer, aerosol passage, gas vent and mouthpiece are sequentially interconnected.

Claim 112 is replaced by the following:

The electronic atomization cigarette according to claim 107, further comprising:

- a silicon gel check valve provided within the sensor;
- a third magnetic steel provided in the silicon gel check valve; and
- a Reed switch provided outside the silicon gel check valve, on a side close to the magnetic steel.

Claim 116 is replaced by the following:

The electronic atomization cigarette according to claim 107, further comprising:

- a heating element provided within the atomization cavity;
- a stream ejection hole provided on one side of the heating element; and
- a porous body arranged outside around a wall of the atomization cavity.

In claim 124 in the second line, after the word 'by' and before the word 'porous', the word 'the' is replaced by the word 'a'.

Claim 127 is replaced by the following:

The electronic atomization cigarette according to claim 107, wherein the atomization cavity comprises a wall made of aluminum oxide.

Claim 128 is replaced by the following:

The electronic atomization cigarette according to claim 107, wherein the atomization cavity comprises a wall made of ceramics.

Reasons for allowance

The following is an examiner's statement of primary reasons for allowance:

There is no teaching in the art of e-cigarettes of the described pressure sensor with a ripple film, two magnetic steels and a magneto device (either one of a hall, reed switch, diode or triode). There is teaching in the art for a porous cap but there is not a teaching of placing the porous material inside the cigarette solution container. Further there is no teaching of a vapor liquid separator located between the sensor an atomizer and further wherein there is a through

hole located arranged on the vapor-liquid separator. Additionally there is no teaching of the above combined with the sequences of parts as described by the instant claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
